

Make your favourite bike to a center piece of your home's interior

There are few places in a city where you would wish to leave your favourite bike overnight. Therefore more bikes are being taken inside peoples home and occupying precious space in their entrances. Why allow it to take up this space, uncelebrated, when your bike can instead become a decorative part of your interior, leaving space in your hallways for the things that matter. Designer Lasse Sundgaard has developed the bike rack GREN; with a design so beautiful and functional that it won the prestigious "German Design Award" 2018.

To avoid the anxiety of heading outside each morning to the sight of a lost bicycle, in most major cities it is necessary to take your bike inside at night, inhabiting unnecessary space. Danish designer and craftsman, Lasse Sundgaard, has found a contemporary solution and designed a bike-rack where the bicycle will hang neatly on the wall without occupying increasingly precious floor space.

It was a family member who first asked Lasse Sundgaard to create a suspended shelf so that he could hang and showcase his bike. Lasse accepted the challenge and developed a suspension that fits beautifully with modern, interior design; both with and without a bicycle. The suspension is lined with soft leather at the bottom which ensures that neither the bicycle, nor the suspension, are accidentally damaged.

It was a long process for Lasse to develop the right solution, but the result is so successful that he has recently won the German Design Award in the category "Bikes and E-bikes".

GREN, the name of the bike-rack, is produced and marketed by Lasse Sundgaard's own company "Made by Bent", in Hamburg, where he also lives and works.

GREN and other products by Lasse Sundgaard can be seen in the international showroom for Nordic design, at Design WERCK, Holmen in Copenhagen.

GREN is available in two varieties: one with Oak veneer and one with nut-wood veneer, both with a silky smooth, oiled surface.

Dimensions: 32 x 25 x 37 cm

Price: 198 €

Further information: GREN has been tested to carry bikes of up to 15 kg
